Objective

I've just graduated in Computer Science and Engineering from University of Dhaka. Besides my academic activities, I like to work on real world applications. This IT industry is changing everyday and I like to keep up with it. I like to work on web applications and graphics mostly. Tough challenges bring the best out of me.

Personal Detail

Father

Late Md. Mozibar Rahman

He was Preventive Officer at Chittagong Custom House at his last job.

Mother

Salma Ali

She is Administrative Officer at National Parliament.

Date of Birth 1st February, 1986

Nationality Bangladeshi

Religion Islam

Education

I've completed my graduation successfully. I prefer to attend an MBA course in near future.

SSC

I've attended SSC on year 2001 from Dhaka Residential Model College and obtained **GPA 4.63** (out of 5.00).

HSC

On year 2003, I attended HSC from Dhaka Residential Model College. I obtained **GPA 4.30** (out of 5.00).

BSc

Completed my graduation from Department of Computer Science and Engineering of University of Dhaka (Session 2006 - 07). I obtained a **total of 1896 marks** (out of 3200) which is **59.25% and a 2nd class**.

Skills and Experiences

Besides my regular academic tasks, I've been involved in software and web development for last few years. I have gathered experience over many latest technologies and tools used now a day.

Some of my preferences:

- Web Development
 - I prefer **PHP** as the scripting language. But I also have experience of working with **ASP .Net** technology. And **MySQL** is my preference for database.
 - **JavaScript** is undeniable now a day and **AJAX** is a common requirement for most of the web applications. I prefer to use **Mootools** library for JavaScript and AJAX needs. I also have experience of working with **ExtJS** and **JQuery**.
 - For web development **CSS** is common practice. And I prefer the **table-less layout** development. I generally use **Blueprint CSS** library for faster production.
 - **CMS** and **MVC** framework are now controlling the web development field. I have experience of working with **Drupal**, **Joomla** and **Wordpress**. I have worked a bit deeper with **Drupal and Joomla templating**. I am also experienced and feel comfortable to work with **CodeIgniter** MVC framework.
- Graphics, UI and Print Media
 - I really enjoy working on **UI** and **Graphics**. I have experience of working with **Adobe Photoshop** and a little with **Adobe Illustrator** for UI and logo designing purpose.
- Desktop Application
 - I am comfortable working with **C# .Net** for desktop application development.
- Other Languages
 - I am familiar with **C/C++** language and **Java SE**. As a programming language I feel more comfortable with Java.

Previous Works

I have worked on several web and desktop applications. Some involved UI development and some involved the complete UI and back-end coding. Here are the most important one's from them:

Web Development | Dynamic URL

(2009)

It is a web application for the purpose of direct marketing. It involves client management, CSV import/export, report generation including graphical representation etc. The system is PHP-MySQL based and I have developed the complete system myself. Developed based on CodeIgniter framework and Blueprint CSS library was used. Used Google Visualization API for report generation.

Class Library | Twitter API

(2009)

I've developed this DLL for searching over Twitter and fetch several user related information. The coding was in C# and based on .Net framework 2.0.

Web Design | Find-Me-A-Dress.com

(www.find-me-a-dress.com | 2009)

I've made the design. First generated PSDs in Adobe Photoshop and later converted it into XHTML.

Web Development | Ingenuity Recruitment

(www.ingenuityrecruitment.com | 2009)

It is a recruitment website based on Joomla and I have developed the template for the website.

Software Development | OTOBI Dealer Management

(2008)

This software was for dealer operations of OTOBI Ltd. It involves inventory management, client management, sales and reporting. The software was developed with C# and based on .Net framework 2.0.

Web Development | ROCA

(www.rocacr.com | 2008)

This was a small community website based on Joomla. I've developed the template for the website and used CB component to make the site up and running.

Web Development | Department of CSE, University of Dhaka

(www.cse.du.edu.bd | 2007-08)

This is the official website of Department of CSE, University of Dhaka. The website is PHP-MySQL based. I mostly worked on the design and CSS and worked on part of the back-end coding.

Web Development | Intermingle

(www.intermingle.co.za | 2007-08)

This is a classified listing website based on PHP-MySQL and also involves automated newsletter system. I have worked on both front-end and back-end development.

Web Development | CACTS Ltd.

(www.cacts.com.bd | 2007)

A website developed for the IT company CACTS Ltd. I've worked on the design and part of the back-end coding.

Web Development | Indian Chef

(www.indianchef.co.za | 2007)

This is a restaurant website and I've worked on the designing.

Web Development | Kirtinaam.info

(www.kirtinaam.info | 2006)

The biography site for legendary Bangalies. The site was PHP-MySQL based and I've worked on front-end development and part of back-end task.

Some other websites I've worked on are **Indigold** (www.indigold.co.za – a corporate company website with CMS feature), **Yusuphysics** (www.yusuphysics.com – a personal blogging website) etc.
